Rheem NZ Ltd	HP_RH001	Rheem	55131007	Integral	310	6 or more	1-Mar-11	62	58	C	2	www.rheem.co.nz	0800 657 336

NOTES & DEFINITIONS

Type : "Integral" - packaged systems that have both the compressor unit and the hot water tank installed together outdoors.

Type : "Packaged Split" - systems with an outdoor compressor unit and a new indoor hot water tank - both parts are installed as a "packaged system" at the same time.

Type: "Custom/Retrofit" - systems with an outdoor compressor unit that can either be connected to a new tank indoors, or retro-fitted to an existing indoor hot water tank .

Eligibility Date - systems must be purchased [after this date](#) to qualify for a grant

Zone 5 = North Island, [except](#) central plateau.

Zone 6 = South Island & North Island central plateau.

% Energy Savings - these are calculated as energy saved compared to a standard "reference" electric resistive hot water system

Low temperature classification: Class A - Products that are suitable for low ambient temperature operation without auxiliary boosting

Low temperature classification: Class B - Products that contain auxiliary boosting devices for operating in low air temperature locations

Low temperature classification: Class C - Products that either do not have an auxiliary boosting system, or have not been tested/assessed for low temperature operation.

27-Apr-11
